

E-Si is a renewable energy 'solutions provider' focussed on the residential market, that encompasses mechanical, electrical and building solutions in a holistic way. We have broad expertise in eco-building solutions. We are currently seeking people who would wish to collaborate in eco-developments.

We have the broadest experience in every type of heat pump, across the Channel Islands. We work with people such as Ice Energy (who have 60% market share in UK) to improve heat pump products, controls and services in the UK market. For example we worked with Ice Energy, Mitsubishi UK and the Jersey Electricity Company to install the Ice Energy's first domestic modulating Ground Source Heat Pump in the UK, and the second one is presently being installed in Guernsey.

## PROJECTS

*Undertaken by E-Si involving heat pumps*

### Ground Source Heat Pumps

#### Guernsey

Listing to be updated shortly.

## SUPPLIERS

Our partners can be found on the web here:

- [www.iceenergy.co.uk](http://www.iceenergy.co.uk) - GS/AS/WS heat pumps
